EDUCATION

Bachelor of Engineering, Computer Engineering (Co-op)
University of Guelph

2026
Guelph, ON

WORK EXPERIENCE

Software Development Engineer (SDE) - GreenShield Canada Aug 2026 - Present

- Developed **Python** and **SQL** automation for web, REST API, and backend validation workflows, integrating repeatable checks into **Azure DevOps** CI/CD pipelines, saving **3 hour/test run**.
- Implemented API validation and performance-testing workflows with **Apache JMeter**; analyzed **Google Analytics** data to support quality and reliability reporting.
- Owned automated test-environment provisioning, refreshes, scheduling, and test-data workflows; led POCs for new **TEM** tooling to improve test reliability.

Software Engineer Intern - Cognitive Systems Corp May 2024 - Dec 2024

- Spearheaded Wi-Fi router validation automation using **Python**, **C**, and **pytest** on **Linux**, saving **2 hours/test run** and ensuring platform compatibility.
- Built **TeamCity** and **Bitbucket CI/CD pipelines** for per-commit integration testing; used pull requests and peer reviews to reduce regression risk.
- Debugged failed platform tests by reproducing issues, isolating root causes, and collaborating with internal QA teams and clients to resolve KPI misalignments.

Cloud Engineer Intern - Rogers Communications Jan 2023 - Apr 2023

- Built an automation workflow with **Azure Functions** and **Azure Power Automate**, reducing repetitive work by **2 hours/week**.
- Automated **Azure** tagging validation with a **Python** workflow in **Azure Functions**, integrating **pandas**, **Azure CLI**, and the **JIRA REST API** to save **15 hours/month**.
- Used **Azure Monitor** to track cloud performance, configure alerts, and support reliable cloud operations.

Software Engineer Intern - Bombardier Aerospace May 2022 - Aug 2022

- Automated **Oracle-to-Excel** reporting with **SQL** and **VBA**, reducing manual reporting effort by **3 hours/week**.
- Developed a **Python hvPlot** dashboard from multiple CSV sources to automate weekly reporting for leadership.
- Built a **Power BI** data model and dashboard used by 75+ employees, consolidating operational reporting and eliminating manual data compilation to save **10 hours/week**.

PROJECTS

WiseWardrobe - Personal Project Apr 2026

- Built a full-stack AI wardrobe application using **React**, **Node/Express**, **MongoDB**.
- Integrated **Ollama (Gemma 3)** into the backend to generate personalized outfit recommendations from natural-language prompts.

SKILLS

Languages: Python · C · SQL · Java · JavaScript · VBA
Backend/Cloud: Azure · Google Cloud · Power Automate · Docker
Data/APIs: REST APIs · Oracle · MongoDB · Power BI · Google Analytics
Tools: Git · TeamCity · Bitbucket · JIRA · Apache JMeter
Practices: Agile (Scrum) · Unit & Integration Testing · API & Design Documentation
Certifications: Microsoft Azure (AZ-900, AI-900, DP-900)
